## **GEOINFOMETRICS SOLUTION CORP.**

*Translating knowledge to service.*

### **Brief Profile**

**Geoinformatics Solutions Corp. (GEOCORP)** is one of the pioneering firms in the Philippines promoting the use of open-source technologies in the field of Geomatics and its wide-ranging applications. The company is committed to supporting Local Government Units (LGUs) and private institutions in establishing efficient Geographic Information Systems (GIS) and Management Information Systems (MIS) to enhance planning, governance, and decision-making processes.

**GEOCORP** aims to strengthen institutional capacity by advancing technical knowledge and fostering innovation through open-source solutions. Anchored on its mission to serve the nation and contribute to sustainable ecosystem development, the company translates technical expertise into practical, cost-effective, and high-quality services.

At the core of GEOCORP's operations is an integrated approach combining **GIS, Planning, and MIS**, which work synergistically to deliver comprehensive and data-driven solutions. GIS serves as the primary tool in developing accurate, efficient, and affordable plans and studies, while MIS ensures organized data management and accessibility for informed decision-making.

**Planning Solutions** are a key component of GEOCORP's services. The company specializes in the preparation of:

- GIS-based Comprehensive Land Use Plans (CLUP)
- Comprehensive Development Plans (CDP)
- Climate Change Adaptation and Disaster Risk Reduction Management Plans (CCARRMP)
- Sectoral and thematic development plans
- Evidence-based policy and spatial planning support

## **GEOINFOMETRICS SOLUTION CORP.**

*Translating knowledge to service.*

### **Brief Profile**

---

These planning services are strengthened by spatial analysis, data integration, and stakeholder engagement, ensuring that all outputs are responsive, sustainable, and aligned with national and local development frameworks.

With a pool of highly skilled experts and technical staff, GEOCORP also develops innovative systems such as the Government Response for E-Commerce Application and Technology (GReAT) System. This platform streamlines LGU transactions, enhances transparency, improves service delivery, and supports anti-corruption initiatives by providing decision-makers with quick access to reliable and centralized information.

By integrating GIS into MIS platforms, GEOCORP ensures that data collected and generated become a valuable baseline for planning and governance. The company continuously improves data quality and system functionality to enhance its service delivery.

Overall, GEOCORP delivers innovative, tailor-fit, and affordable solutions that meet client needs while maintaining the highest standards of quality—empowering institutions through technology, data, and strategic planning. The company has simple guiding principle in providing its services: Whatever you do, work heartily as for the Lord not for men (Col. 3:23).

# Core Values

- Integrity
- We uphold honesty, transparency, and accountability in all our actions, building trust with our clients and stakeholders.
- Empathy
- We value and understand the needs of our stakeholders, ensuring that our solutions are responsive, inclusive, and people-centered.
- Long-Term Vision
- We go beyond immediate results, focusing on sustainable solutions that create lasting value for communities and organizations.
- Innovation
- We foster creativity and continuous improvement by embracing new ideas, technologies, and approaches in planning and systems development.
- Agility
- We adapt quickly to change, challenge the status quo, and deliver efficient solutions with focus and responsiveness.
- Unity
- We believe in collaboration and teamwork, recognizing that shared efforts lead to stronger and more impactful outcomes.

# Services/Products

## **GIS SOLUTIONS**

- Global Positioning System
- Remote Sensing
- Simulation and Modeling
- Cartography
- GIS-based tax mapping

## **MIS SOLUTIONS**

- Installation of Government Response for e-Commerce Application and Technology (GReAT) System
- System Analysis and Design
- Network Analysis and Design
- Web-based System
- System Auditing
- Databased Management System
- Content Management System
- Domain Registration and Configuration

**GEOINFOMETRICS
